Active Secret Clearance

PROFESSIONAL SUMMARY

Full Stack Developer and Operations Specialist with 4+ years supporting Department of Defense programs and building production-ready web applications. Combines React, Next.js, backend systems, and SaaS architecture experience with expertise managing \$112M+ in assets and supporting 259K beneficiaries. Known for building scalable systems, managing data integrity, leading collaborative development workflows, and executing in high-accountability environments.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Framer Motion, Recharts

Backend & Data: Node.js, Express.js, MongoDB, Mongoose, Supabase, REST APIs, JWT Authentication, CRUD Operations, Database Design

Tools: Git, GitHub, VS Code, Vercel, Postman

Concepts: Responsive Design, Component-Based Architecture, API Integration, Authentication Systems, Debugging, Agile Development

PROFESSIONAL EXPERIENCE

Founder & Full Stack Developer — Lauren Parker Studios (2025 – Present)

- Founded and operate a web development studio delivering modern, high-converting websites
- Design and develop full stack applications using React, Next.js, Tailwind CSS, and Supabase
- Manage full lifecycle: client communication, development, deployment, and iteration
- Deploy scalable applications via Vercel with backend integrations and API routes

Full Stack Developer Intern — ERA Solutions (Jan 2026 – Present)

- Develop features using React and JavaScript in Agile environment
- Integrate backend systems using Supabase for real-time functionality
- Collaborate using Git workflows and pull requests

PROJECT EXPERIENCE

Lauren Parker Studios — Web Development Studio Portfolio

- Designed and delivered multiple client websites with modern UI/UX and conversion-focused layouts
- Managed branding, development, and deployment for business clients

Gateway Rock Design — Client Project

- Developed full business website using Next.js and Tailwind CSS
- Designed conversion-focused UI and deployed via Vercel

PMP Inc Professionals — Client Project

- Built responsive website with backend integration using Supabase

InvoiceFlow — Full-Stack SaaS Invoicing Dashboard

- Built a full-stack SaaS invoicing dashboard using React, Node.js, Express, MongoDB, and JWT authentication
- Developed invoice CRUD functionality, analytics dashboards, responsive mobile navigation, and recruiter-friendly demo login workflows
- Implemented premium SaaS UI systems with Tailwind CSS, Framer Motion, reusable dashboard architecture, and Vercel deployment pipelines
- Designed production-style frontend/backend workflows including protected authentication, invoice management, and responsive mobile UX

ClientFlow CRM — Full-Stack Client Management Platform

- Engineered a full-stack CRM dashboard with Supabase integration, live client management workflows, analytics tracking, and responsive UI architecture
- Built CRUD systems for client records, project pipelines, budget tracking, and searchable filtering connected to a live backend database
- Developed modern dashboard interfaces featuring responsive mobile navigation, animated charts, reusable components, and glassmorphism-inspired UI systems
- Integrated real-time database operations, analytics visualizations, and enterprise-style SaaS workflow simulations

Warrior Dad Stories — Project Lead & Full Stack Developer

- Leading development of a custom storytelling, author branding, and ecommerce platform for veteran author T.J. Baird
- Planned site architecture, content strategy, and user experience while coordinating project execution from concept through deployment
- Built scalable frontend systems using React, Vite, Tailwind CSS, and React Router with reusable layouts and responsive navigation
- Developed administrative interfaces for content management, media libraries, product management, site settings, and future publishing workflows
- Managed client requirements, content integration, branding implementation, deployment pipelines, and iterative design improvements
- Established Git/GitHub collaboration workflows including branching strategy, pull request reviews, onboarding documentation, and contributor ticket management
- Delivered a production-ready platform supporting storytelling content, media promotion, book marketing, and long-term business growth

Vetess Platform (In Development) — Project Lead, Full Stack Developer & UI/UX Lead

- Serving as Project Lead and Full Stack Developer for a veteran employment and resource platform
- Designed and implemented the complete Supabase backend architecture, including authentication, database configuration, data management workflows, and administrative functionality
- Built major platform features including the Job Board, Veteran Resources, Donate, About, Contact, Admin Dashboard, and Career Center Locator
- Designed and implemented responsive UI/UX systems aligned with production-level Figma requirements
- Managed GitHub collaboration, pull requests, deployment workflows, code reviews, and feature integration across multiple contributors
- Debugged and resolved frontend and backend issues including routing failures, deployment errors, authentication problems, and database integration challenges
- Led project architecture decisions while maintaining platform stability, scalability, and production readiness

Expense Tracker Application

- Developed dynamic front-end application using JavaScript with real-time UI updates

MILITARY EXPERIENCE

Procurement & Quality Assurance Specialist — U.S. Air Force (Feb 2023 – Aug 2025)

- Maintained 100% audit readiness by ensuring data integrity and compliance across logistics systems
- Managed \$112M in medical materiel supporting 259K beneficiaries across multiple facilities
- Led distribution of 695K items valued at \$12.5M, ensuring system accuracy and operational availability
- Managed \$7.8M global medical readiness program supporting operations in 178 countries
- Evaluated vendor data, technical requirements, and procurement workflows to optimize delivery timelines
- Tracked and managed operational datasets across system workflows
- Served as DMLSS System Administrator, maintaining system integrity and conducting audits
- Trained and mentored 24 personnel across multiple operational systems and accounts

Shipping & Receiving Specialist — U.S. Air Force (Feb 2022 – Feb 2023)

- Managed inbound/outbound logistics including hazardous materials with strict compliance protocols
- Maintained inventory accuracy through structured tracking systems and verification processes

EDUCATION

Community College of the Air Force — Logistics & Supply Chain (In Progress)
